- 3) Homework corrections are due the class period after you receive your first graded submission back.
- 4) Late penalties still apply to homework corrections.

If you turn in corrections, your homework assignment score will be adjusted such that you are given the average of your two homework scores.

In addition to assigned homework, select problems from each chapter of your textbook will be posted on blackboard for further practice. These problems provide additional practice on concepts and problems covered in class, on homework assignments, and on exams. Completion of these problems is **optional**. However, it is in your best interest to understand how to answer each of these examples. At the end of the semester, you will be given the opportunity to turn in a practice problem journal for **extra credit**.

3	I have noticed first-hand that many students dread this statistics requirement. Many wonder why a statistics class is necessary for psychology majors. Others think back to math courses with considerable anxiety. I want you to know that I am aware that many students are nervous about this class and, above

	Mastering the basics of statistics is much like learning a new language – it requires practice, practice, practice, practice. New material builds on older material, and it is essential that you stay up on the class material. Here are some general strategies to consider when going through the course:
